

[Baker & O'Brien, Inc.](#) is seeking to fill the position of Consultant.

Baker & O'Brien, Inc. is an independent consulting firm serving the oil, gas, and other related industries. Baker & O'Brien's clients are usually firms that produce, process, or market petroleum and/or petrochemical products. However, we also advise companies that interact with the oil and gas industry, including financial institutions, insurance companies, law firms, hydrocarbon consumers, and government entities. We maintain offices in Dallas and Houston, Texas.

#### **Job Description**

We are looking to expand our consulting practice and seeking candidates with technical, commercial, and project management experience in the refining, petrochemical, natural gas, pipeline, or power industries. Experience in the design/engineering, construction, operations, and/or commercial management of facilities is required. Typical client engagements include market and feasibility studies, technology assessment, due diligence, asset valuation, litigation support, and contract disputes/audits.

#### **Qualifications We Are Seeking**

- Bachelors Degree in engineering, preferably Chemical or Mechanical
- MBA preferred but not required
- Minimum of 10 years industry experience
- Previous consulting experience preferred but not required
- Travel – 25% on average, U.S. and international

#### **What We Offer**

Baker & O'Brien offers interesting and challenging assignments in a professional work environment.

Following are some of the key elements of our generous compensation and benefits package:

- Competitive salary
- Highly Attractive retirement plans
- Significant bonus potential
- Fully company-paid medical, dental, prescription drug, disability and life insurance plans
- Tuition reimbursement for qualified courses of study
- Paid vacation and holidays

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.
